## Rain Chances Today

A few storms may become strong

Weather Forecast Office  
Amarillo, TX

Issued Jul 19, 2021 5:41 AM CDT

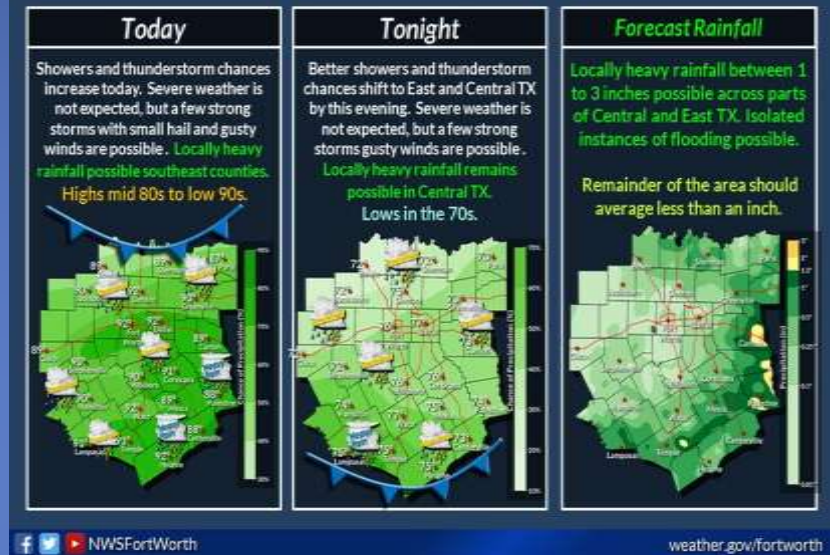

Isolated shower and thunderstorms are possible today across the Panhandles. A few storms may become strong with the main threats being gusty winds and small hail.

## A Stormy and Wet Start To The Week

July 19<sup>th</sup> - A cold front moves through the area this afternoon & evening

Weather Forecast Office  
Fort Worth, TX

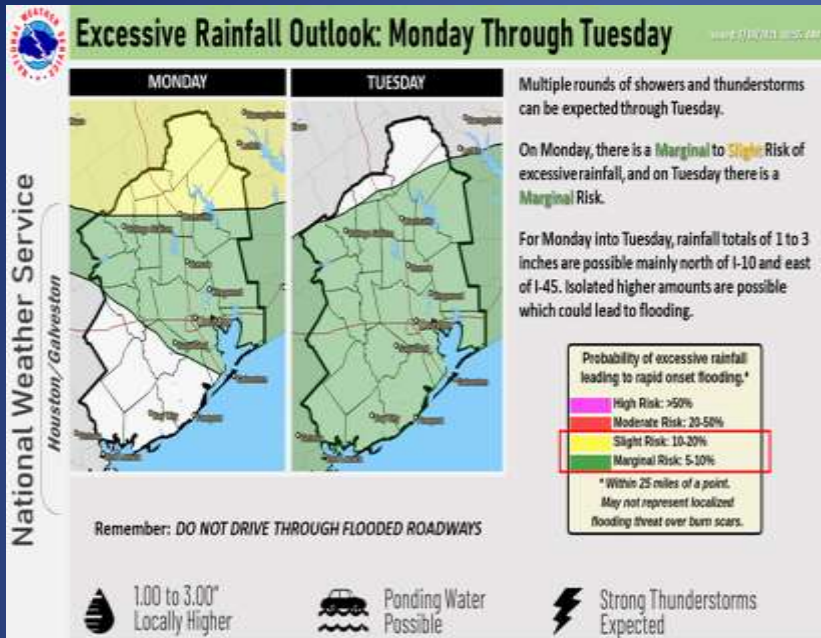

Issued July 19, 2021 3:57 AM CT

A cold front currently located across Southern Oklahoma will move slowly through the region today, before exiting Central Texas later this evening. Increasing clouds and chances for showers and storms will hold highs between the mid 80s and lower 90s most locales. A few thunderstorms will remain possible behind the cold front through sunset. Locally heavy rainfall across parts of East and Central Texas between 1 to 3 inches may result in a few instances of flooding, mostly of the minor variety. Widespread severe weather isn't anticipated however, stronger storms will be capable of very gusty outflow winds, small hail, and frequent lightning.

# Hazardous Weather

**A cold front approaching SE Texas late Monday into Tuesday will enhance the development of showers and thunderstorms, increasing rainfall totals during the next few days. There is a Marginal to Slight risk for excessive rainfall for Monday and a Marginal risk for Tuesday.**

**A rare Mid-Summer cold front brings a return of chances of showers and thunderstorms midday into this afternoon. Locally heavy rains and minor flooding are possible. Slightly below normal high temperatures continue.**
